Dear Forest User:

The Ashgrove Cement Company, near Leamington, Utah, proposes to expand their current operations by about 250 acres from their original proposal submitted in 1980.

The expansion will be on mining claims in the Fishlake National Forest that the company has held for a number of years. This proposed expansion should include the company's needs for the next ten years for continued mining and areas for disposal of unusable material.

The location of the expanded mining operation is: Township 15 South, Range 3 West, North 1/2 of Section 4, North 1/2 of Section 5 and the North West 1/4 of Section 3, as shown on the attached map.

If you have any concerns or questions about this proposal please contact Bill Wright at the U.S. Forest Service, P.O. Box 265, Fillmore, UT 84631 (801)743-5721, by May 20, 1994.

Sincerely,

*Douglas P. Reid*
